

Environment and Safety Policy

Moncalieri, 12/01/2024

Environment and Safety Policy

With this Policy, the Management communicates inside and outside the company its intention to operate with efficient and transparent methods to ensure the continuous improvement of a socially, ethically and economically sustainable corporate Management System.

General objectives

- ? from the definition of new activities, or the revision of existing ones, aspects relating to the environment, health and safety are considered essential content;
- ? the workplace and working conditions are safe and healthy, developing a growing awareness of prevention;
- ? waste management is carried out in line with regulatory provisions and through qualified parties, preferring sustainable and recyclable materials and promoting separate collection;
- ? offices and production areas are powered by renewable electricity and initiatives are promoted to reduce energy consumption.

All workers are informed, trained and made aware to carry out their tasks safely and in protection of the environment, ensuring active participation also through their safety representatives.

Commitments

The responsibility for managing the environment, health and safety concerns the entire company structure, so that:

- ? machinery, plants, equipment, workplaces and operating methods are designed to safeguard the environment, the health of workers, company assets, third parties and the community;
- ? information on company risks and environmental aspects is spread to all workers;
- ? emerging needs are addressed quickly and effectively, eliminating hazards and reducing risks;
- ? preventive actions and the prevention of accidents and occupational diseases are favoured;
- ? regulatory compliance obligations and company standards are respected;
- ? environmental pollution is prevented and the use of natural resources is reduced;
- ? objectives of continuous improvement in environmental, health and safety performance are pursued;
- ? training plans are applied and the involvement of all employees in Health, Safety and Environment matters is increased.

The Management defines an annual improvement programme, specifying the objectives.
